Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicants elect the subject matter of group I, with dithioacetal or dithioketal as elected species, therefore, claims 1-5 and 16-18 are read on the elected species. In the case if the elected species is found allowable then the search will be expanded to other species.

Groups II and III will be rejoined into group I if this group is found allowable.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 16-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 1138670.

The reference discloses a polymerizable composition for a lens with a high refractive index resin, the composition containing a polythiol compound having a dithioacetal skeleton which is selected from the group consisting of 1,1,2,2-tetrakis(mercaptomethylthio)ethane, 1,1,3,3-tetrakis(mercaptomethylthio)propane---(see page 3, [0021], lines 34-35, which are read on that of claims 5 and 18.

Art Unit: 1711

The reference further discloses iso(thio)cyanates having a functional group can react with mercapto group from polythiol compound to form the same product, a high refractive index, a lens. (see Abstract, page 4, [0025-0026]).

The disclosure of the reference differs from the instant claims in that it does not disclose the polythiol compound having a general formula (1) in claims 3 and 16.

However, the reference does disclose the claimed specific polythiol having a dithioacetal skeleton, as stated above. In view of this similarity, it would appear to be inherent that a polythiol compound having the claimed formula (1) must be considered inherent in the prior art. See *In re Best*, 195 USPQ 430, 433 (CCPA 1977).
